

2 Day Basic Scaffold Inspection

Objectives

By the end of the course delegates will be able to carry out the requirements of the Work at Heights Regulations 2005 for inspection of tube & fitting scaffolding working platforms including an overview of system scaffold.

Who for

All supervisors and managers responsible for inspecting, recording & signing off scaffold structures. Delegates should have a basic understanding of construction work at heights.

Course content

- Statutory requirements & codes of practise.
- Identify scaffold materials & components.
- Equipment tolerances.
- How scaffold is formed.
- Scaffolding foundations.
- Ties.
- Access & egress
- Working platforms.
- Types of scaffold to be inspected.
- Inspection & registers.
- Practical Inspection.

Training method

A highly participative course, with a practical inspection to compliment the classroom theory session. This course can be delivered on client's premises depending on the facilities and delegate numbers. An area set aside from the normal working area will be required along with a suitable scaffold for the practical session.

Scaffolds covered on this course

- Putlog & Birdcage
- Independent & Towers
- Gantry & Splay
- Truss-out & Cantilever
- Loading Bays & Saddle Roof

Additional Information

Delegates attending this course must be physically fit. If you have any concerns about a delegate and their suitability for attending the course, please don't hesitate to contact us for advice.

This course meets the criteria for CITB grants. CITB registered companies will be able to claim £26.00 per person per day for this course. The UTN administration team will give full support for the application of this grant.
