

Location And Avoidance Of Underground Apparatus

Objectives

This course is designed to make candidates aware of the dangers involved in excavating on public highways and private land and train them to detect and avoid most buried apparatus.

Who for

Everyone connected with excavation will benefit from this course, including: designers and planners, safety personnel, site management and all operational staff including machine operators.

Course Content

- Responsibility under Health & Safety at Work Act.
- Responsibility to work to HSG47.
- Obtaining and understanding utilities drawings.
- Observation of surface features—manholes, lamp standard etc.
- Use of locating Cat & Genny or similar.
- Careful excavation.
- Practical assessment.

Training Method

This course is highly participative with both theory and practical sessions, highlighted by the use of PowerPoint presentation.

Additional Information

This course meets the criteria for CITB grants. CITB registered companies will be able to claim £26.00 per person per day for this course. The UTN administration team will give full support for the application of this grant
